25X1

25X1 On 3 July 1951, it was learned that, by order of the SCC, arrangements for the immediate delivery of 30,000 tons of cement and appropriate quantity of gravel were to be made. Dolinov, (fnu), was in charge of material supplies for projects undertaken by the Soviet Occupation Power. The following quantities of cement and gravel were scheduled to arrive daily between 15 and 30 July 1951 at the following places:

	<u>Cement (in tons)</u>	<u>Gravel (in tons)</u>
Merseburg	162	18
Damgarten	90	10
Werneuchen	432	48
Brand	351	39
Zerbst	603	67
Welzow	234	26

Deliveries to the places mentioned above were to be given priority over all other deliveries, except for the Huettenkombinat (Foundry Combine), Fuerstenberg/Oder. *

25X1 * Comment. From the reported places slated for deliveries it can be assumed that the cement and gravel will be used for airfield construction confirmed construction work at the airfields concerned. The fact that the airfields at Perleberg and Erfurt-Bindersleben are not supplied indicates that construction work at these airfields has been postponed. Cement and gravel were sent to the individual places at a ratio of 9:1. 25X1
